

**AMENDMENTS TO THE CLAIMS:**

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Currently amended) A body sticking sheet for application to a body region of a user which includes an affected area, the body sticking sheet comprising:
  - a first portion having a first degree of ~~shrinkage contactably receivable stretchability, said first portion being stickingly applicable~~ to the affected area; and
  - a second portion surrounding the first portion, said second portion including a second degree of ~~shrinkage contactably receivable stretchability and being stickingly applicable~~ to a portion of the body region surrounding the ~~first portion affected area, said second degree of shrinkage stretchability~~ being 2 to 20 times greater than said first degree of ~~shrinkage stretchability~~, said second portion being expandable and contractible radially with centering on the first portion.
2. (Previously presented) A body sticking sheet according to claim 1, wherein a size of said first portion is about 5 to 50 mm.
3. (Previously presented) A body sticking sheet according to claim 1, wherein said second portion includes a notch or incision extending radially inward from an outer periphery thereof.

4. (Previously presented) A body sticking sheet according to claim 1, wherein an outer peripheral shape of said second portion is in a general shape of a circle.

5. (Previously presented) A body sticking sheet according to claim 1, wherein an outer peripheral shape of said second portion is in a general shape of a triangle.

6. (Previously presented) A body sticking sheet according to claim 1, wherein an outer peripheral shape of said second portion is in a general shape of a rectangle.

7. (Previously presented) A body sticking sheet according to claim 1, further comprising adhesive applied to a contact side of each of said first and second portions.

8. (Currently amended) A body sticking sheet for adhesive application to a body region of a user which includes an affected area, the body sticking sheet comprising:

a first portion comprised of a material including a first degree of **elasticity** stretchability;

a second portion comprised of another material including a second degree of elasticity stretchability greater than said first degree of elasticity stretchability, said second portion at least partially surrounding an outer periphery of said first portion and being expandable and contractible radially with respect to said first portion; and an adhesive being disposed on a contact side of said body sticking sheet including said first and second portions such that said first and second portions are adhesively receivable stickingly applicable to said body region with said first portion for being stickingly applied to said affected area.

9. (Previously presented) A body sticking sheet according to claim 8, wherein said second first degree of elasticity is 2 to 20 times greater than said first degree of elasticity.

10. (Previously presented) A body sticking sheet according to claim 8, wherein a size of said first portion is about 5 to 50 mm.

11. (Previously presented) A body sticking sheet according to claim 8, wherein said second portion includes a notch or incision extending radially inward from an outer periphery thereof.

12. (Previously presented) A body sticking sheet according to claim 8, wherein an outer peripheral shape of said second portion is in a general shape of a circle.

13. (Previously presented) A body sticking sheet according to claim 8, wherein an outer peripheral shape of said second portion is in a general shape of a triangle.

14. (Previously presented) A body sticking sheet according to claim 8, wherein an outer peripheral shape of said second portion is in a general shape of a rectangle.
